Wondering About Your Child's Development?

Ages 4 months to 60 months

Developmental checkups ensure that children are developing appropriately in the areas of speech, language, hearing, vision, social interactions and/or motor skills. The Ages and Stages Questionnaire can determine if a child is progressing at an age-appropriate rate. It helps to identify children who might benefit from additional support.

Please call Christine Kinahan to book a private developmental check-up at (403)-345-3000
